Section: Claims 11 of 12 pages

## **CLAIMS**

- 1. A rail mounted vertically suspended partition panel to separate orders at the checkout counter, comprising a hinge member connecting a turret with said partition panel, also equipped with a panel hatch for loading and a panel frame for securing promotional materials for various products and services.
- 2. A rail mounted vertically suspended partition panel to separate orders at the checkout counter, wherein a live hinge attached to said panel, provides for the vertical manipulation of said panel.
- 3. A rail mounted vertically suspended partition panel to separate orders at the checkout counter, comprising a turret connected to said panel by way of a live hinge, facilitating the lateral manipulation of said panel.
- 4. A rail mounted vertically suspended partition panel to separate orders at the checkout counter, wherein a turret base housing metal bearings, facilitates the linear motion of said panel along said rail.
